EXPERIENCE

CureMD

Jan. 2024 – Present

Software Developer

Lahore, Pakistan

- Developing and enhancing a **healthcare web application** using React.js within a cross-functional agile team, contributing to feature delivery across multiple sprint cycles.
- Implementing and optimizing responsive user interfaces to deliver a **seamless, accessible patient and provider experience** across web platforms.
- Conducting code reviews and ensuring high-quality **frontend–backend integration** with RESTful APIs and backend services.
- Collaborated with the **New York-based product team** to build and deliver the Oncentric healthcare platform using ASP.NET, focusing on UI optimization and workflow improvements.

BrainsLogic

Apr. 2022 – Dec. 2023

Web Developer

Lahore, Pakistan

- Built and maintained responsive web applications using **React.js, Next.js, Bootstrap, and Material UI**, collaborating closely with design and backend teams.
- Implemented new features and functionality, consistently improving user experience and maintaining **high code quality** through regular reviews and testing.
- Coordinated frontend–backend integration, ensuring seamless data flow and smooth API communication across application layers.
- Translated **Figma and PSD mockups** into pixel-perfect, production-ready, fully responsive web pages.

NetSol Technologies

Sept. 2021 – Feb. 2022

Web Development Intern

Lahore, Pakistan

- Assisted in building a responsive web application using **Bootstrap and JavaScript**, delivering a visually consistent and accessible UI across devices.
- Worked alongside the design team and performed testing and debugging to ensure a smooth, bug-free user experience.

PROJECTS

Royal Fleet | *Next.js, REST API, Responsive Design* | royal-fleet.vercel.app

- Built a responsive **fleet management web application** using Next.js with seamless frontend–backend integration, emphasizing performance and scalability.
- Designed and implemented an intuitive user interface, ensuring smooth navigation and optimized load performance across devices.

AutoBid-Up | *Next.js, Django, Real-time Bidding* | [GitHub](#)

- Final Year Project** – a full-stack car auction platform with real-time bidding functionality, built with Next.js (frontend) and Django (backend).
- Demonstrated strong full-stack integration with user-friendly bidding flows, authentication, and live auction updates.

LawMinder | *React.js, Node.js, MongoDB* | [GitHub](#)

- Developed a **legal case management platform** for tracking cases, documents, and deadlines, built with React.js and MongoDB.
- Focused on dynamic, user-centric design with responsive layouts and efficient data management.

Oncentric | *ASP.NET, Healthcare Platform* | oncentric.com

- Contributed to a **production healthcare platform** at CureMD in collaboration with the New York team, optimizing UI components and improving overall application functionality.

EDUCATION

University of Management and Technology

Oct. 2019 – Nov. 2023

Bachelor of Science in Software Engineering

Lahore, Pakistan

- **Relevant Coursework:** Data Structures & Algorithms, Software Engineering, Web Technologies, Databases, OOP, Computer Networks

SKILLS

Frontend : React.js, Next.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, SCSS, Tailwind CSS, Bootstrap, Material UI, Responsive Design, Web Accessibility (a11y), SEO Best Practices

Backend : Node.js, Express.js, REST API Development & Integration, MongoDB, Django, PHP, Laravel

Languages : JavaScript, TypeScript, Python, C#, C++

Tools & Workflow : Git, GitHub, Figma, Postman, Photoshop, WordPress, AI-assisted Development, Agile/Scrum

Core Competencies : Clean Code, Code Reviews, Refactoring, Performance Optimization, Cross-functional Collaboration, Figma/PSD to Responsive Web Implementation
